Subject:	Appl. No. 10/720,712
Attachments:	Proposed amendment to claim 52.doc

Examiner Bhatia,

Thank you for calling a few minutes ago to discuss this application. Based on my comparison of claim 52 to claim 1, I believe claim 52 already recites the language regarding the use of a page update handler to incorporate the service data into the page. Thus, I believe claim 52 will be consistent with claim 1 if we amend the claim as shown in the attachment, namely to add language indicating that the first portion of the page includes "a placeholder for the requested service data."

Please let me know if this addition is acceptable. If it is, you have our authorization to enter in via an Examiner's Amendment.

I have reviewed the claims that depend from claim 52, I do not believe any changes to those dependent claims will be needed to maintain consistency.

Sincerely,

Ron Schoenbaum
